

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date: May 29, 2003

Site Contact(s): Rob Garren (URS Group, Inc.)

Extension: X2609

Regulatory Contact: Arch Crouse

Extension: X2793 or 692-3156

Agency: Colorado Department of Public Health and Environment, Air Pollution Control Division (CDPHE, APCD)

Purpose of Contact (include topics discussed and documentation supplied):

Mike Putney and Rob Garren with URS Group Air Quality Management, a subcontractor to K-H ESS, met with Arch Crouse with CDPHE, APCD on May 21, 2003. The purpose of the contact was to discuss the Site's approach to calculating air pollutant emissions from the 903 Pad Lip Area Remediation and potential Air Pollutant Emission Notice (APEN) requirements.

Discussion:

The group discussed the Site's 903 Pad Lip Area Remediation plans and the air monitoring network that will be set up during the demonstration phase of the excavation and collection of contaminated soil by vacuum extraction. The monitoring network, as outlined in the sampling and analysis plan, will be used to develop emission factors for vacuum extraction projects that may generate contaminated dust plumes.

The group reviewed initial emission calculations based on conservative assumptions and discussed APEN reporting requirements. Arch agreed that it would be beneficial to wait to submit an APEN for the remediation of the lip area until results are obtained from the sampling of the demonstration phase to ensure emission estimates are accurate and reflective.
